Barton Brands, Ltd.

Bardstown, KY 40004

October 30, 2007

Lisa Beckham, Reviewer

SOURCE ID: 21-179-00020

SOURCE A.I. #: 3247

ACTIVITY ID: APE20060001

SOURCE DESCRIPTION:

On October 19, 2004, the source applied to the Division for a renewal Title V permit for the operation of distillery in Bardstown, Kentucky.

The renewal permit includes a source-wide limit on sulfur dioxide of 225 tons per year, a source-wide limit of 15,000 tons per year of coal, a source-wide limit of 9.0 tons per year for hydrogen chloride and a source-wide limit of 22.5 tons per year for total hazardous air pollutants (HAPs). The facility is also installing a new baghouse with limestone injection on its coal-fired boiler to reduce particulate and hydrogen chloride emissions.

During the U.S. EPA review period the facility submitted administrative changes that were included in this final permit.

U.S. EPA REVIEW:

The Division issued the proposed permit on September 12, 2007. The U.S. EPA was notified of the issuance of the proposed permit on September 12, 2007 via e-mail. The comment period expired 45 days from the date of e-mail. No comments were received from the U.S. EPA during this period. The permit is now being issued final.
